## Career Objective

---

Computer Science undergraduate specializing in Artificial Intelligence and Machine Learning, focused on building practical AI systems and production-ready full-stack applications. Experienced with AI agents, LLM integrations, RAG, modern web development, APIs, databases and cloud deployment. Seeking a Software Engineer / AI Developer internship, where I can contribute to real-world products while growing as an AI-focused engineer.

## Education

---

|                                                                                       |                                  |
|---------------------------------------------------------------------------------------|----------------------------------|
| <b>KVG College of Engineering (KVGCE), Karnataka, India</b>                           | <b>Expected Graduation: 2027</b> |
| B.E. in Computer Science and Engineering (Artificial Intelligence & Machine Learning) | <b>CGPA: 8.09 / 10</b>           |

## Technical Skills

---

- **Languages:** Python, SQL, HTML
- **Frameworks & Libraries:** FastAPI, Flask, React, Next.js, Node.js, Tailwind CSS
- **AI & Machine Learning:** LLM APIs (Groq, Ollama), RAG Pipelines, ChromaDB, Vector Databases
- **Cloud & DevOps:** Render, Vercel, Docker, GitHub Actions, Railway
- **Developer Tools:** Git, GitHub, Linux, VS Code, MySQL Workbench

## Projects
